Computer Network Help on the way

Does the current tech support take forever to call you back and respond to your requests?

Are you paying them good money to keep things working, but are still having constant problems, slowness and other recurring issues?

Are you worried they are not backing up and securing your network?

Are you ready for First Class Service?

My name is Shaw , owner operator of Elite Buyer Corp. We specialize in delivering complete and proactive IT support and services to business like yours with friendly, knowledgeable techs that will put you at ease and resolve your IT problems quickly and efficiently. Chances are you've never heard of me or my company before, but when you finish reading this letter, you'll be glad you finally have.

Why do I make such a statement?

Because almost every small business owner I talk to will confess that their current computer support company (person) is not completely delivering the level of service they want. Therefore, they are forced to deal with ongoing technical issues and worry that their network is NOT secure from hackers, ransomware, extended downtime, HIPAA compliance and a range of data erasing disasters. Clearly this is unacceptable!

Time to make a change.

Although the notion of providing reliable, affordable, full-service computer support isn't an amazing concept, it still surprises me how many computer technicians don't get it right. Therefore, I understand if you're skeptical about our claims. My guess is that you've been disappointed, even burned, by the IT guys in the past. That's why I'd like to extend the following offer to you.

A \$399 GETS to Know ME FREE GIFT

As a prospective client, I'd like to offer you a FEEE, no-obligation, no-sales pressure network assessment where I'll personally come to your office to conduct an audit of your network's security and overall health.

When done, we'll give you a report of findings that will not only reveal if your data and computer network really are properly backed up and secured but also if there is anything you need to do now to prevent a major network outage, data loss, hacker attack or other expensive, data erasing disaster. Pulse we can almost always show you how to save on hardware and software by switching to more efficient technologies.

After all, it never hurts to get ta complete bid from a qualified third party – and this assessment is totally, completely free without obligation.

How to get this FREE offer

To schedule your FREE Network Assessment, please call my personal at 562-366-4177 or send me an email to shaw@elitebuyer.com

The Assessment will take 60 minutes to conduct, when done you can ask any question or concerns.
